FAIRFAX EGG BANK SERVICE BENEFITS

# Oocytes/ Order	Minimum of six (6) mature oocytes per order ("cohort")	
Guarantee	Cost	Included in cohort purchase price
	Quality Standard	<p>Fairfax EggBank guarantees that the warmed oocytes from each paid cohort will result in at least one good embryo: a good quality 6 cell embryo on Day 3, an early blastocyst if embryos are cultured out to Day 5, an expanding blastocyst if embryos are cultured out to day 6, or an embryo that is biopsied and/or vitrified.</p> <p>If the paid cohort does not meet the quality standard, Fairfax EggBank will provide the patient with one free replacement cohort (at least 6 frozen oocytes) for a future cycle.</p>
	Conditions & Limitations	<ol style="list-style-type: none"> 1. All oocyte handling and warming are performed using Fairfax EggBank recommended or approved protocols; 2. The entire original cohort of oocytes must be warmed prior to request for replacement cohort; 3. Semen analysis is documented and shows > 1 million total motile sperm and good morphology; 4. The semen is obtained by ejaculation, not through surgical extraction or other means; 5. ICSI is used for insemination; 6. If some or all embryos are cryopreserved, suitable embryos for transfer must be used prior to request for a replacement cohort; 7. Within 90 days following oocyte warming, Client or Client's clinic reports the situation to CAN-AM's Client Services department at 888-245-3471, and the clinic submits supporting documentation; and 8. Fairfax EggBank, based on the clinic's data, determines that the applicable embryo development threshold has not been met.
Price for Full Allotment/ Cohort		C\$17,200 + tax*
Payment & Delivery Time	Delivery up to 2 weeks once full payment is received by e-transfer/money order/bank draft or transfer.	

*HST (13%) applicable, except in Alberta, BC, & Manitoba where only 5% GST is applicable
