Detailed medical history and three generations of family history

In depth descriptions of each donor is available including childhood & adulthood photos available for each donor

SECURING YOUR DONOR

Support from an experienced Client Relations Specialist to help you find and reserve the best donor for you

Ability to secure your donor quickly through our coordination process between you and your clinic.

Flat cost for 6-8 mature, good quality eggs with a strong embryo development guarantee

SCHEDULING YOUR DONOR IVF CYCLE

IVF cycle easily scheduled based on your menstrual cycle

Centralized shipping operations ensuring safe and quick delivery of donor eggs to your clinic

# Oocytes / Order	Minimum of six (6) mature oocytes per order ("cohort")	
	Cost	Included in cohort purchase price
	Quality Standard	Fairfax EggBank guarantees that the warmed oocytes from each paid cohort will result in at least one of the following: a good quality 6 cell embryo if a transfer is done on Day 3, an early blastocyst if embryos are cultured out to Day 5, an expanding blastocyst if embryos are cultured out to day 6, or an embryo that is biopsied and/or vitrified. If the paid cohort does not meet the quality standard, Fairfax EggBank will provide the patient with one free replacement cohort (at least 6 frozen oocytes) for a future cycle if all conditions are met.
Guarantee	Conditions & Limitations	<ol style="list-style-type: none"> All oocyte handling and warming are performed using Fairfax EggBank recommended or approved protocols; The entire original cohort of oocytes must be warmed prior to request for replacement cohort; Semen analysis is documented and shows > 1 million total motile sperm and good morphology; The semen is obtained by ejaculation, not through surgical extraction or other means; ICSI is used for insemination; If some or all embryos are cryopreserved, suitable embryos for transfer must be used prior to request for a replacement cohort; Within 90 days following oocyte warming, Client or Client's clinic reports the situation to CAN-AM's Client Services department at 888-245-3471, and the clinic submits supporting documentation; and Fairfax EggBank, based on the clinic's data, determines that the applicable embryo development threshold has not been met.
Price for Cohort	\$17,200 CAD	
Payment & Delivery	Delivery up to 2 weeks once full payment is received by e-transfer/money order/bank draft or transfer.
