

# Fairfax EggBank's Embryo Services

Fairfax EggBank (FEB) has partnered with CAN-AM Cryoservices to offer Canadian patients Embryo Services as an option to help build their families. Intended parents will select a FEB frozen egg donor, then FEB will thaw and fertilize the donor eggs with the patient's partner sperm or donor sperm. FEB guarantees 2 good quality embryos, each at least the early blastocyst stage, will be vitrified and shipped back to the referring clinic for transfer via CAN-AM Cryoservices. The total cost for FEB's Embryo Services is CAN\$18,080 plus taxes and shipping. Below are key components of our services.

## Donor Selection

*Frozen donor eggs from a trusted global leader in gamete banking*

FEB is a sister company to Fairfax Cryobank, an international sperm bank operating since 1986. With a wide selection of ethnically diverse, pre-screened, and U.S. FDA compliant donors in FEB's database, you will find FEB provides one of the richest and most reliable databases for donor eggs.

- Access detailed medical and family history profiles
- Receive adulthood photos upon completion of a confidentiality *Patient Photo Agreement*
- Work with experienced coordinators who will assist you with the entire donor matching process

## Embryo Pledge Guarantee

*One of the strongest assurances in the donor embryo market*

FEB is confident in the quality of its donors, the expertise of its scientists, and the experience it has in vitrifying and warming oocytes and embryos.

- FEB guarantees 2 good quality embryos, each at least the early blastocyst stage, will be vitrified and shipped back to your referring clinic for transfer via CAN-AM Cryoservices
- If FEB does not meet this standard, the intended parent will have the option of choosing another FEB Donor or receiving a full refund less shipping costs. To learn more, refer to our *Embryo Services Terms of Use* agreement

## Embryo Services Process

*FEB, a trusted partner to CAN-AM Cryoservices - the largest Canadian distributor of donor eggs and sperm*

Once matched, intended parents will sign a *Terms of Use* agreement to reserve the donor for 10 business days.

- The intended parents will have their physician complete and sign an *Embryology Procedure Order Form* for laboratory services
- Upon approval of the order form, payment made to CAN-AM Cryoservices
- CAN-AM will arrange for and facilitate, at an additional cost, the export of the intended parent's sperm from Canada to FEB's laboratory in Virginia, USA
- FEB will complete Embryo Services within 30 business days upon receipt of sperm source and documentation

## Best-in-Class Customer Service

*Your partners throughout your fertility journey*
