

DONOR ESSAY

Donor Number: 10B46

Please print plainly and in ink only

Why do you want to be a donor?

I want to be a donor because it brings me joy when I see others able to explore and pursue their passions and dreams. If my donation can make a family closer to their ideal lifestyle, then I'm excited and more than happy to do it. I also see this as an act of service to those that otherwise could not have children.

Please describe your personality and character.

I am someone who dearly values integrity and transparency. I am a person that loves to be of service to those in need because I see it as an expression of love. I see myself as a genuine and real person who appreciates others and seeks to help whenever I can.

What are your hobbies, interests and talents?

My favorite things to do at home are play/write music, play video games, and cook awesome food. I think these three things are incredible sources of community and allow me to express myself and express my love for my dear friends and family.

If a message could be passed on to the recipient of your donation, what would that message be?

Take this opportunity and find ways for your own personality to grow alongside your child. Love and quality time together are irreplaceable. Seek opportunities to laugh with your loved ones.

Describe your philosophy of life.

I think the most beautiful things in life are our differences. That is what makes meeting people exciting and fulfilling. I challenge you to dig deep and find a definition for the word success. I do not use the word success on a whim because I know that it looks different for everyone.
