

Staff Impression 10B70

Face: The face is square-shaped, with a smaller forehead than average. The donor has dark brown facial hair, forming a beard fuller in the center around the mouth and chin. A few freckles scatter the cheeks. The cheekbones are set high but are not prominent.

Chin: 10B70's chin is squared with a visible prominence, despite being covered completely by dark facial hair.

Lips: The lips are quite full and a light pink color. There's a slight cupid's bow, and the shape turns downward towards the corners of the mouth.

Nose: The nose is straight front both the forward-facing angles as well as the side profile. 10B70's nose is very narrow and short, slightly upturned to see the flare of the nostrils.

Ears: The ears are larger than average and lay close to the head, even with glasses on. The earlobes are attached to the head. The left ear sticks out slightly more than the right.

Eyes: The eyes are a round-almond shape and are smaller in size. They are set an average distance apart. 10B70 wears glasses with black frames that do not cover the bottom of the lenses. The eyelashes are thick and dark but short.

Eyebrows: Donor's eyebrows have a medium thickness, with some visibility taken away due to the glasses covering the midportion of the eyebrows.

Hair: 10B70's hair is straight and thick, combed over to the right side neatly. The donor has dark brown hair.

Teeth: The teeth are small and straight, falling below a visible gumline when smiling.

Summary: 10B70 has a way of communicating that is "matter-of-fact." Straight to the point and with a smile, the donor is bound to be a leader. This is reflected in the career, as the individual manages many people under various operations. Astute, focused, and well-mannered, 10B70 is a person you'd want to take charge of a team.
